

Appendix C Flood Risk from Rivers

Addendum 13 July 2017

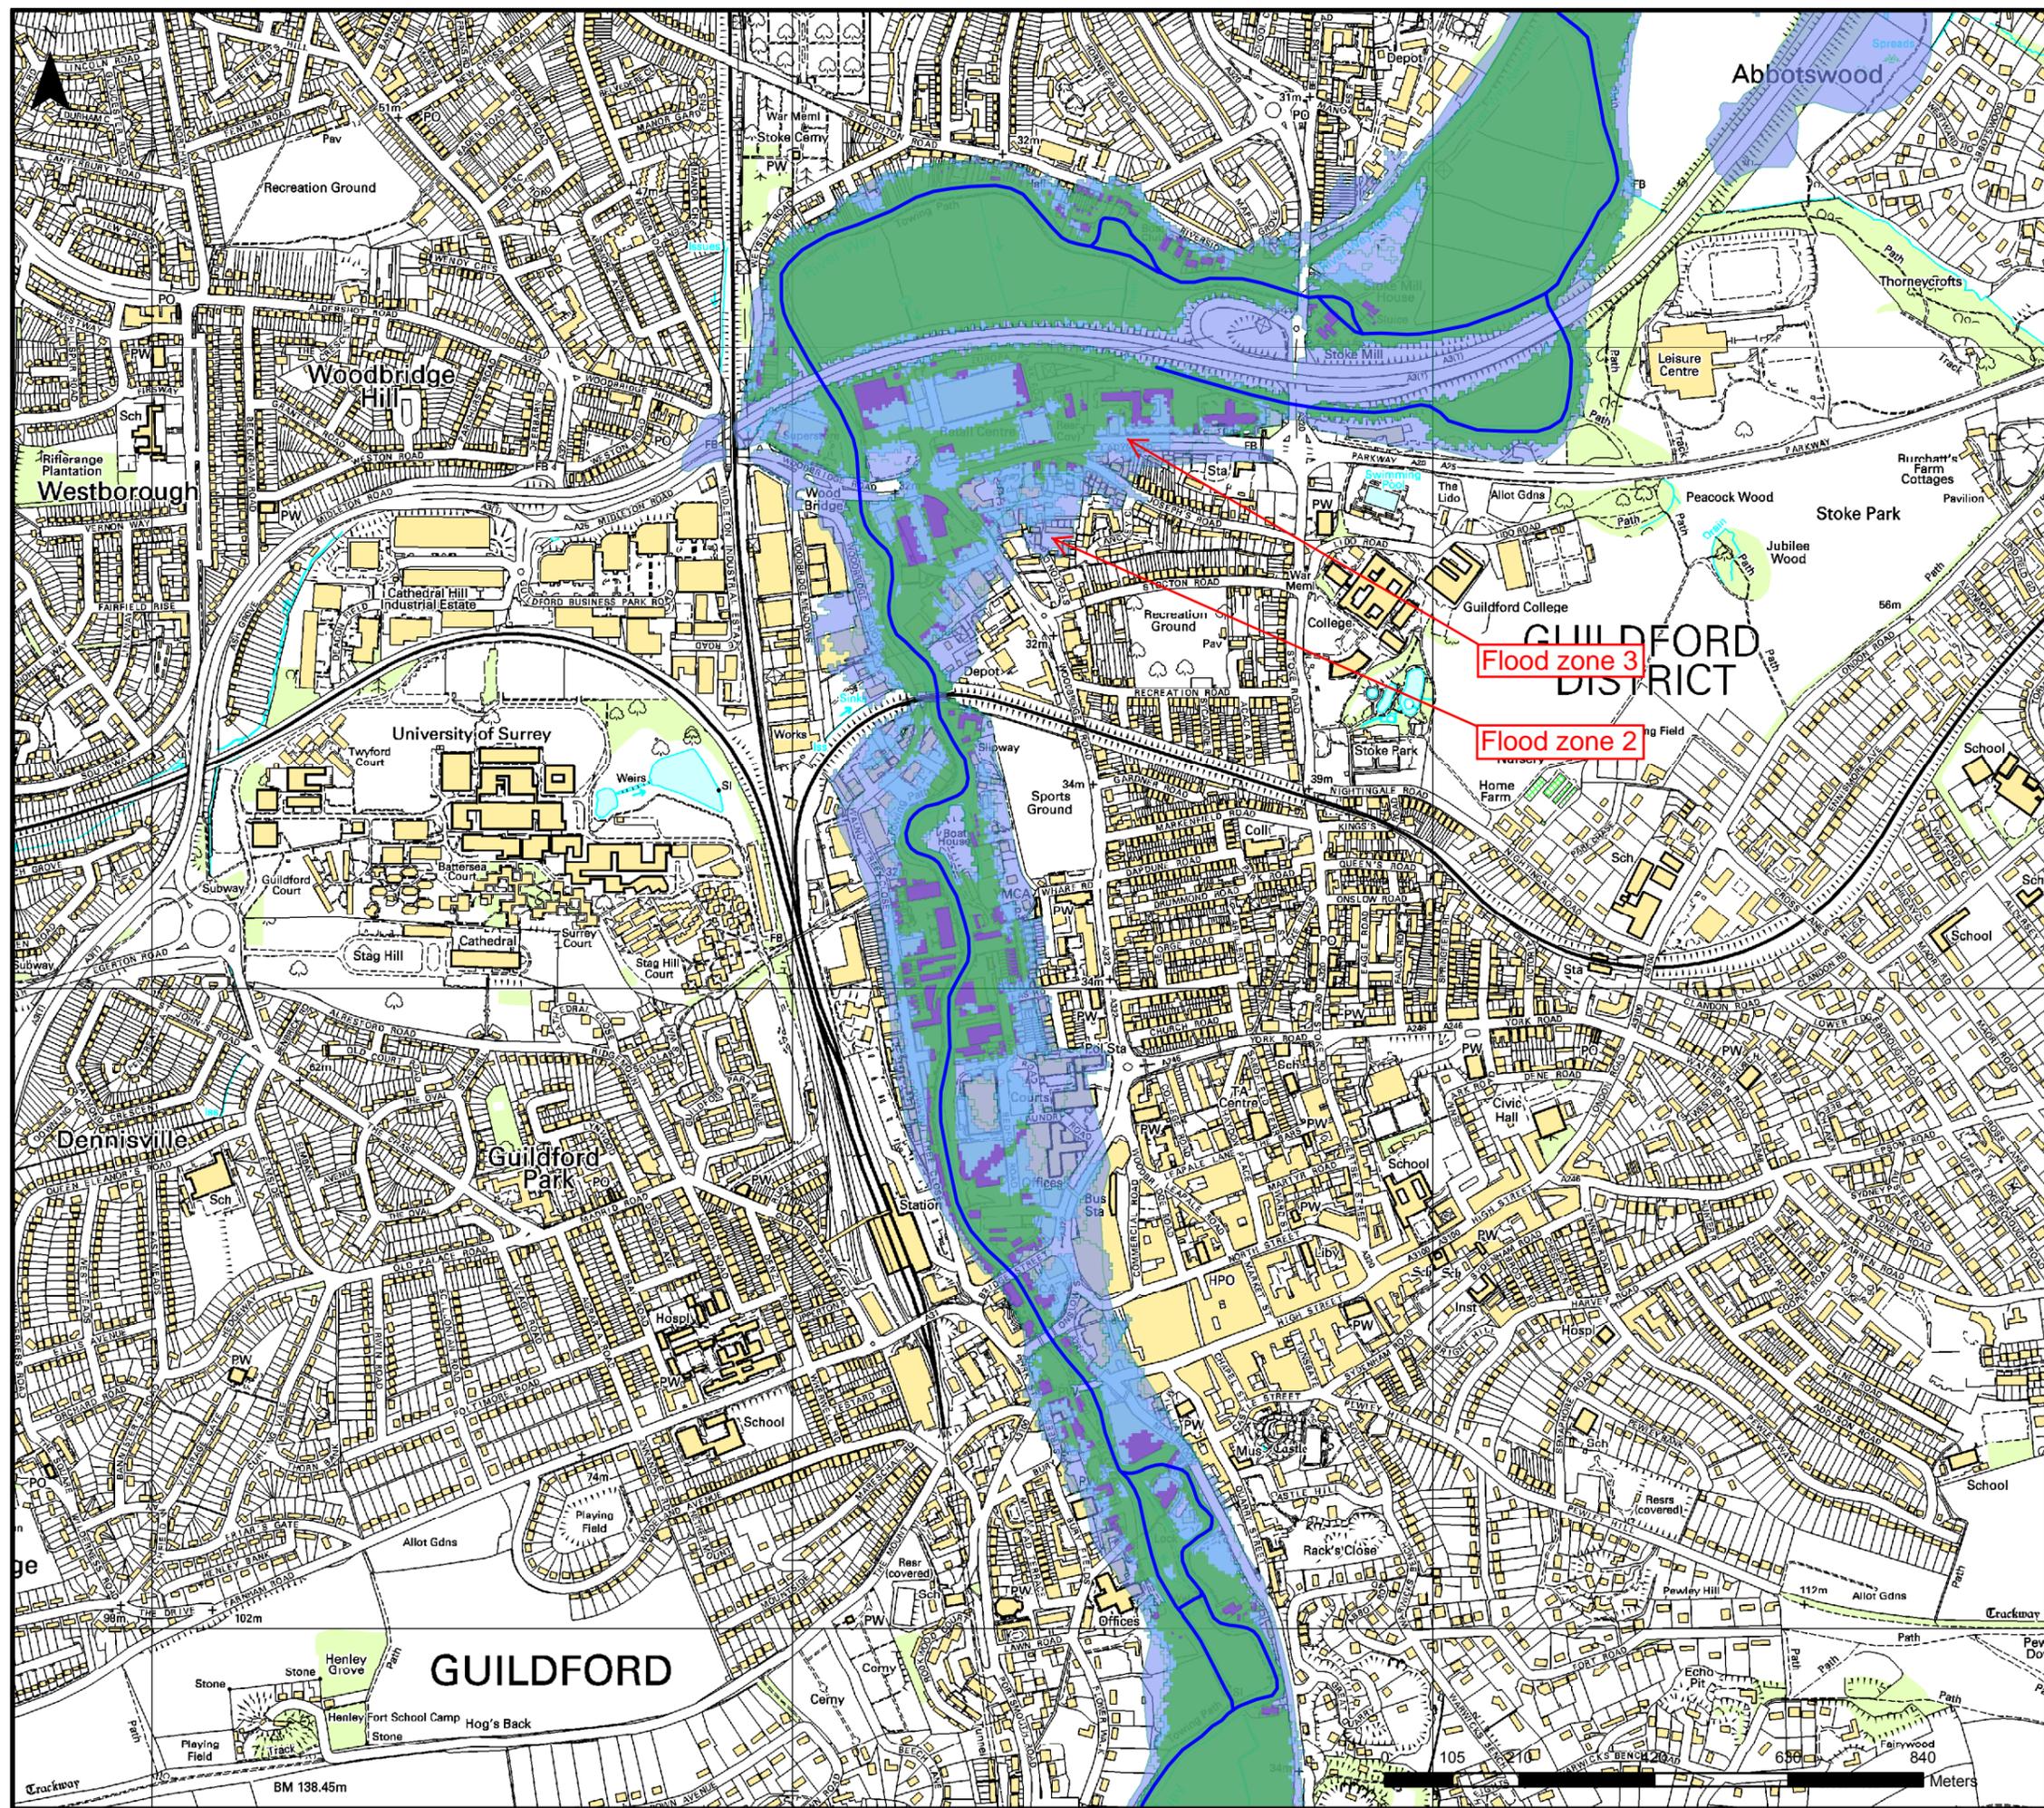

Due to the interaction between the colours of the map layers, the layer transparencies and the colour of the basemap, the following map (Appendix C Flood Risk from Rivers 1) may be unclear as to which area is flood zone 2 and which area is flood zone 3.

The following clarification was added beneath the legend on 13 July 2017.

"For the avoidance of doubt, flood zone 3 is the zone that falls closest to the river in most places, and flood zone 2 is the zone that falls furthest from the river in most places. Please refer to the labels on the map for clarity."

Labels indicating the flood zones have been added to the map.

The data on the map is correct. The Council will reissue the map at a future date to improve the presentation of the data.

- Legend**
- Main River
 - Borough Administrative Boundary
 - Flood Zone 3b - Developed
 - Flood Zone 3b - Undeveloped
 - Flood Zone 2
 - Flood Zone 3

For the avoidance of doubt, flood zone 3 is the zone that falls closest to the river in most places, and flood zone 2 is the zone that falls furthest from the river in most places. Please refer to the labels on the map for clarity.
