## Schedule of proposed main modifications to the Submission Local Plan (2017)

The proposed main modifications to the Submission Local Plan: Strategy and Sites are set out below. Text added for the Main Modifications Consultation is shown as <u>underlined</u> and deleted text is shown as <u>strikethrough</u>.

Further modifications have been proposed in the process of the extended Examination Hearings (12<sup>th</sup> and 13<sup>th</sup> February 2019). New/amended text proposed as part of these Hearings is shown as <u>blue underlined</u> and deleted Main Modifications text is shown as <del>double strikethrough</del>.

Where maps have been modified, the area of change is shown within a yellow box and additions and deletions are shown on small inset maps.

## Policies

Mod No.	Paragraph or Section		Proposed Modification
Policy S	1: Presumption	on in fav	our of sustainable development
MM1	Policy para (3)(a)	(3)	<ul> <li>Where there are no policies relevant to the application or relevant policies are out of date at the time of making the decision, then the Council will grant permission unless material considerations indicate otherwise, taking into account whether:</li> <li>a) Specific policies in that Framework indicate that development should be restricted. The application of policies in the National Planning Policy Framework that protect areas or assets of particular importance provides a clear reason for refusing the development proposed; or</li> </ul>
MM1	Reasoned Justification para 4.1.4	4.1.4	Local Planning Authorities are encouraged to include a policy within their Local Plan that embraces the presumption in favour of sustainable development. Policy S1 meets this requirement and adopts the model wording suggested. When implementing Policy S1, local circumstances will be taken into account to respond to different opportunities for achieving sustainable development. In accordance with the NPPFpolicies in the NPPF that protect important natural and heritage assets, the presumption will not automatically apply to policies relating to; habitats sites (including sites protected under the Birds and Habitats Directives)-and/or, designated as Sites of Special Scientific Interest (SSSIs), development requiring appropriate assessment because of its potential impact on a habitats site <sup>6</sup> , land designated as Green Belt; or Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets_and-or_locations identified as at risk of flooding.

Policy S	olicy S3: Delivery of development and regeneration within Guildford Town Centre				
MM3	New policy (whole policy)	POLICY S3: Delivery of development and regeneration within Guildford Town Centre			
		Coordination of development in the Town Centre			
		(1) Development proposals will be encouraged to seek opportunities to enable the future development potential of adjacent sites and not undermine their development potential.			
		More efficient use of land and the acceleration of housing delivery			
		(2) Major applications will be expected to deliver a mix of uses and include residential development. Residential development in mixed use schemes will be expected to meet identified housing need.			
		(3) Schemes must demonstrate that they have made the most efficient use of land both in terms of the quantum of development and the mix of uses.			
		(4) In seeking to achieve more efficient use of land and/or accelerated housing delivery and/or regeneration, the Council will where appropriate utilise mechanisms such as its compulsory purchase powers.			
		Place shaping and character and design of new development			
		(5) New development will have regard to:			
		<ul> <li>a) the provisions of Policy D1;</li> <li>b) the historic environment, street pattern and topography;</li> <li>c) important views into and out of the town centre from the surrounding landscape;</li> </ul>			
		d) views within the town centre of important historic buildings and local landmarks.			
		(6) Schemes must demonstrate high quality urban design and contribute wherever possible to achieving:			
		<ul> <li>a) mixed use developments with active ground floor uses;</li> <li>b) defined public and private spaces which are well-enclosed;</li> <li>c) an attractive and safe public realm;</li> <li>d) legible routes that are easy to understand and to move through, and give priority to pedestrians and cyclists over motor vehicles;</li> </ul>			
		e) improved access and views to the River Wey.			

MM3	Reasoned	Reasoned justification
	Justification para 4.1.18 to 4.1.25	4.1.18 Our Corporate Plan (2018-2023) identifies regenerating and improving Guildford town centre and other urban areas as one of three strategic priorities supporting its "Place Making" theme. Key projects to support this and the delivery of the Local Plan include:
		<ul> <li>(a) Facilitating the delivery of a major new mixed development in North Street</li> <li>(b) Implementing the vision of the Town Centre Regeneration Strategy</li> <li>(c) Improving the public realm, including surfaces, in key town centre areas</li> </ul>
		4.1.19 This policy and the Town Centre Regeneration Strategy will help deliver the following objectives:
		(a) enhance the vibrancy of Guildford Town Centre (b) create and foster high quality design
		(c) protect the town's heritage and overall feel
		(d) respect existing townscape at both the street and roof level
		(e) create an enhanced and more positive public realm
		(f) reduce the concrete environment atmosphere
		(g) realise the Council's 'drive to, not through' concept to reduce the impact of traffic in the town centre,
		complementing future environmental improvements
		(h) link the Town Centre to the train station
		(i) open up the River Wey and improve connections to the river
		(j) assist in meeting Guildford's housing demand
		(k) ensure schemes are sustainable and do not lock future development potential
		(I) promote and create an investment friendly environment
		4.1.20 Whilst the Council will play a key coordinating role aimed at achieving delivery of development and
		4.1.20 Whilst the Council will play a key coordinating role aimed at achieving delivery of development and regeneration, working with partners such as Surrey County Council, Network Rail and the National Trust,
		the private sector is central to this process. It is important that schemes that seek planning permission are
		conceived and designed in a manner that considers regeneration opportunities beyond the boundaries of
		the site. Collaboration between adjacent and surrounding property owners in the Guildford town centre,
		including efforts that seek to maximise regeneration opportunities through mutually supportive design
		elements, uses and access arrangements are supported.

	4.1.21	The delivery of housing in the town centre adds to its vitality and vibrancy. The Council regards the town
		centre as critical in terms of meeting needs for main town centre uses. This includes high trip generating
		uses such as offices and retail, where there are opportunities to encourage linked trips and maximise the
		use of public transport networks. However, the town centre also represents the most sustainable location
		for new higher density housing. Whilst the Local Plan provides for sufficient sites to meet housing needs
		over the plan period, as part of regeneration efforts, more housing is likely to come forward over the plan
		period. It is important that this occurs in a manner that makes the most of its central location and is thus
		developed at a density that maximises its sustainability benefits whilst responding to heritage, design and
		flooding considerations. Consideration should also be given to the potential to minimise the provision of car
		parking where this can help optimise the density of development.
	<u>4.1.22</u>	
		employment uses/floorspace in the town centre, in line with national and Local Plan policies. This will help
		ensure the efficient use of land and presents an opportunity to enhance the vitality of the town centre and
		increase delivery of homes in sustainable locations.
	4.1.23	Enhancing the vitality and vibrancy of the town centre cannot occur solely though more intense uses, nor
	4.1.23	greater numbers of residents. A quality public realm needs to support day-to-day activities, peoples' well-
		being, safety and sense of place and forms the basis for the area's attractiveness to residents, workers and
		visitors.
	4.1.24	The public realm includes publicly-owned streets, squares, pathways, parks, publicly accessible open
		spaces, right of ways, and any public or private building and facilities that are accessible by all. Whilst parts
		of the town centre reflect high quality public environments, there are areas where this could be improved.
		This is often in areas that represent opportunities for regeneration and intensification of development.
	<u>4.1.25</u>	
		more attractive place to live, work and visit and will be a key component of the area's regeneration. This
		could occur through a range of interventions such as improving surfacing of public space, providing more
		generous pedestrian environments, landscaping, street furniture, lighting and public art. The Council will
		seek contributions toward the improvement of the public realm from developments, where appropriate. The
		Council will also continue working with Surrey County Council to implement measures that deliver public
		realm enhancements.

MM3	Key Evidence	Key Evidence     The Guildford Town Centre Regeneration Strategy (Guildford Borough Council, 2017)
MM3	Monitoring indicators	Monitoring Indicators
		Indicator Target Data source
		The number of new homes completed each year in the town centreN/APlanning applications and appeals
Policy	H1: Homes for	all
MM4	Policy para (2)	(2) Development that results in the net loss of <u>all-existing</u> housing, <u>including sites allocated for housing within</u> the Local Plan will not be permitted. Development that results in the net loss of (C2 use class or C3 use class accommodation or traveller accommodation), <u>including sites allocated for such use in the Local Plan</u> , will not be permitted. <u>Significant reductions from the approximate housing numbers or reductions from the specific traveller accommodation provision and housing uses as set out in the site allocations will be resisted.</u>
MM5	Policy para (6)	(6) Sufficient sites are allocated within the Local Plan to meet the accommodation needs of Gypsies, Travellers or Travelling Showpeople (as defined by Planning Policy for Traveller Sites) as set out in the latest Traveller Accommodation Assessment as well as to cater for the potential additional needs of households of unknown planning status. These sites are for a mix of tenures and provided on a number of small sites and as part of larger development sites to help create sustainable and mixed communities. Sites are also allocated within the Local Plan to contribute to meeting the assessed needs of Gypsies, Travellers and Travelling Showpeople who do not meet the Planning Policy for Traveller Sites definition.

MM5	Reasoned Justification paras 4.2.22 and 4.2.23	4.2.22	The identified traveller accommodation target is set out in Policy S2 (3). Sufficient sites are identified allocated within the Local Plan to meet the target based on the accommodation need identified in the TAA (2017) for 4 permanent pitches for Gypsies and Travellers and 4 plots for Travelling Showpeople up to 2034. There are also sufficient allocated sites to make provision for 8 permanent pitches to meet potential additional need of households of unknown planning traveller status. These allocated sites are for a mix of tenures and provided on a number of small sites and as part of larger development sites to help create sustainable and mixed communities.
		4.2.23	Whilst-tThe needs of Gypsies, Travellers and Travelling Showpeople who do not meet the <u>Planning Policy</u> for <u>Traveller Sites</u> planning policy definition fall outside this <u>target</u> <sup>4</sup> allocation, <u>However</u> , in order to meet their assessed needs, <u>as demonstrated through the TAA (2017) findings</u> , we will seek to provide 41 permanent pitches for Gypsies and Travellers and 4 permanent plots for <u>Travelling Showpeople</u> who do not meet the planning policy definition. A total of 59 Gypsy and <u>Traveller</u> pitches (net) and 8 <u>Travelling</u> Showpeople plots (net) have been identified in the site allocation policies. We will also seek to make provision for 8 permanent pitches to meet potential additional need of households of unknown planning traveller status.Our <u>The</u> TAA (2017) found no evidence of need for a transit site within our borough. The <u>Council will keep this position under review and</u> , should the need for a transit site arise, will work with neighbouring authorities to address this.However, we will continue to work with neighbouring authorities to address the issue of transit site is finecessary.

Policy	H2: Affordable	homes	
MM6	Policy paras (2) to (4a)	(2)	The CouncilWe will also seek affordable homes on sites providing five <u>10-11</u> or more homes (gross), or sites of 0.17 ha or more regardless of the number of homesor where dwellings would have a combined gross internal floorspace of more than 1,000 square metres. We The Council will seek at least 40%-per cent of the homes on these sites as affordable homes.
		<u>(2a)</u>	In Designated Rural Areas, the threshold where we will seek an affordable housing contribution of at least 40% of the homes on these sites will be on sites providing more than 5 dwellings. For developments of between 6 and 10 dwellings inclusive (gross), or where dwellings have a combined gross internal floorspace of more than 1,000 square metres, a financial contribution in lieu of on-site provision of affordable housing will be sought which is of broadly equivalent value relative to on-site provision.
		(3)	The tenure and number of bedrooms of the affordable homes provided on each qualifying site must contribute, to the Council's satisfaction, towards meeting the mix of affordable housing needs identified in the Strategic Housing Market Assessment 2015, or subsequent affordable housing needs evidence. This currently includes a tenure split of at least 70% Affordable Rent, with the remainder being other forms of affordable housing. <u>A minimum of 10% of the affordable homes provided on each site under this policy must</u> <u>be available for affordable home ownership, except where an exemption applies in the NPPF.</u> Affordable Rent must be no more than the maximum level set out in our most recent housing guidance or strategy.
		(4)	Affordable housing contributions may be provided off-site, or by payment in lieu where the Council agrees that on site provision and management would be impractical due to size and / or location of the development. Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site. The agreed off-site provision must be completed before 50% of the market homes are occupied unless otherwise agreed by the Council. On developments in designated rural areas of between 6 and 10 dwellings inclusive (gross), or where dwellings have a combined gross internal floorspace of more than 1,000 square metres, the commuted payment in lieu of on-site affordable housing provision will be payable after completion of the units within the development.
		<u>(4a)</u>	If developers satisfactorily demonstrate that providing the amount of affordable housing required by this policy would not be economically viable, the Council will consider the following to assist with delivering a scheme: (a) varying the tenure mix of the affordable housing (for example, more intermediate housing and less rented housing), size, and/or type of homes to be provided; and/or (b) reducing the overall number of affordable homes.

MM6	Reasoned Justification para 4.2.35	4.2.35	This policy applies to all new homes within the C3 Use Class. This generally includes retirement homes, as well as self-contained studio flats for a single household, whether specifically aimed at students or not. It does not apply to residential institutions such as care homes and nursing homes. Assisted living, extra care and other C2 residential developments may be required to make provision; these will be considered on a case by case basis.
MM6	Reasoned Justification para 4.2.38	4.2.38	Land values and property prices are generally high across the borough, although with considerable variation. Our viability evidence shows that the vast majority of housing developments in most locations in the borough are viable providing an affordable housing contribution of 40 per cent. <u>Bearing in mind that viability assessment was undertaken in preparation of the Local Plan, the impact of policies on development viability have been considered and are regarded as realistic. The need for a viability assessment at planning application stage will thus need clear justification by the applicant in line with paragraph 57 of the NPPF. Should this need be accepted, the Council will need to weigh the outcomes and implications of the viability assessment against all circumstances relating to the case as part of considering the acceptability of the proposal.</u>
MM6	Reasoned Justification para 4.2.40	4.2.40	<ul> <li>There may be some circumstances where abnormal costs would make the scheme unviable to deliver.</li> <li>Where developers demonstrate to our satisfaction that providing the amount of affordable housing required by this policy would not be economically viable, we may consider the following to assist with delivering a scheme:</li> <li>(a) vary the tenure mix of the affordable housing (for example, more intermediate housing and less rented housing), size, and/or type of homes to be provided</li> <li>(b) reduce the overall number of affordable homes</li> </ul>
MM6	Reasoned Justification para 4.2.42	4.2.42	In calculating the number of affordable homes to be provided on a site, fractions of homes will sometimes be required. In order to avoid requirements for fractions of homes we will therefore round up any part requirement of an affordable housing dwelling in line with common convention at 0.5 of a home, and down at 0.4 or less. A replacement home, would not therefore make any contribution as part of a development scheme, would count when determining whether the scheme meets the minimum threshold for which an affordable housing contribution is required, although would not count when calculating the number of affordable units needed.

Policy I	H3: Rural exce	ption ho	mes
MM7	Policy paras (1) and (2)	(1) ( <u>2</u> )	<ul> <li>Small scale affordable housing developments in the Green Belt, which can include including pitches for travellers Gypsies and Travellers not meeting the Planning Policy for Traveller Sites definition of a gypsy or traveller<sup>16</sup>, will be permitted to meet identified local affordable housing needs provided that:</li> <li>a) the site adjoins or is closely related to, and in safe and reasonable walking distance of a defined or a non-defined rural settlement, and</li> <li>b) the number, size and tenure of homes would be appropriate to meet, or to contribute to meeting, the identified affordable housing needs of the local community , and</li> <li>c) the affordable homes are all secured in perpetuity.</li> <li>The minimum number of market homes to make a rural exception scheme viable will be permitted where:</li> <li>(a) a developer demonstrates that the scheme would be unviable without the inclusion of market housing, and</li> <li>(b) it does not inflate the threshold land value<sup>17</sup>, and</li> <li>(c) it is suitably integrated into the rural exception development.</li> </ul>
MM7	Reasoned Justification para 4.2.49	4.2.49	We will work with parish councils, the Surrey Rural Housing Enabler and landowners to understand the affordable housing needs of people with a local connection to specific rural areas. In applying this policy, consideration will be given to the needs of the local community by accommodating households who are current or recent former residents of the Parish or have a current employment or family connection to it., or are current or recent former residents of the Parish. We will also facilitate provision of rural exception sites for local agricultural workers, and for local settled travellers needs who don't meet the Planning Policy for Traveller Sites definition of gypsy or traveller where such an accommodation need is demonstrated in line with Policy H3 (1). Traveller rural exception housing accommodation will be provided on council-owned public pitches on small, suitably located sites in the Green Belt.
MM7	Reasoned Justification para 4.2.52	4 <u>.2.52</u>	There may be situations where a developer demonstrates that a rural exception scheme would be unviable. In such situations, and where there are no alternative sites available to provide the identified local affordable housing needs (as required by national policy) we may consider permitting the minimum number of market homes to make the scheme viable. We may also consider allowing at least one market home where this would result in a significant improvement in the housing mix (tenure, type or size) or rent levels. The inclusion of market housing must serve to benefit the rural affordable housing stock and not inflate the "threshold land value".

Policy	P2: Green Belt			
MM9	Policy paragraphs (1) to (4)	<ul> <li>to be protected against inappropriational planning policy, the corrand Inappropriate development of demonstrated. Very special circle reason of inappropriateness, and they are consistent with the exect following criteria: The construction development, unless the building of this policy, the following define</li> <li>Extensions or alterations</li> <li>(3) The extension or alteration of a and above the size of the origination of the building of the size of the origination. The following as it extensions or alteration of a and above the size of the origination.</li> </ul>	briate development in accordance with instruction of new development will be will not be permitted unless very spec- umstances will not exist unless the po- id any other harm, is clearly outweighter re not considered to be inappropriate. eptions listed in national planning poli- on of new buildings in the Green Belt will gs fall within the list of exceptions iden- itions will apply to those exceptions: building provided that it would not res- al building. all mean either: disted on 1 July 1948; or	considered inappropriate ial circumstances can be itential harm to the Green Belt by ed by other considerations. Proposals will be permitted where cy and, where relevant, also meet the will constitute inappropriate ntified by the NPPF. For the purpose

Replacement buildings
(4) The replacement of a building, provided the new building:
(a) would be in the same use, and (b) is not materially larger than the one it replaces, and (c) is sited on or close to the position of the existing building.
(b) A new building will only constitute a "replacement" if it is sited on or in a position that substantially overlaps that of the original building, unless it can be clearly demonstrated that an alternative position would not increase the overall impact on the openness of the Green Belt.
Limited infilling
<ul> <li>(c) "limited infilling" shall mean:         <ul> <li>Limited infilling within the identified settlement boundaries, as designated on the Policies Map, of the following villages. Limited infilling may also be appropriate outside the identified settlement boundaries where it can be demonstrated that the site should be considered to be within the village.</li> </ul> </li> </ul>
Albury, Compton, East Clandon, East Horsley <del>(south)</del> , Gomshall, Holmbury St Mary, Peaslake, Pirbright, Puttenham, Ripley, Shere, West Clandon, and Worplesdon.
ii. Limited infilling may also be appropriate outside the inset settlement boundaries, as designated on the Policies Map, of the following villages where it can be demonstrated that the site should be considered to be within the village.
Ash Green, Chilworth, East Horsley, Effingham, Fairlands, Flexford, Jacobs Well, Normandy, Peasmarsh, Ripley, Send, Send Marsh/ Burnt Common, Shalford, West Horsley and Wood Street Village.
iii. Limited infilling may also be appropriate <del>either outside the inset or identified settlement boundaries, or and</del> in the following villages, where it can be demonstrated that the site <u>should be</u> is as a matter of fact considered to be within the village:
Artington, Eashing, Farley Green, Fox Corner, Hurtmore, Ockham, Seale, Shackleford, The Sands, Wanborough and Wisley.

		<u>(3a)</u>		nent are also considered not inappror not conflict with the purposes of includ	priate in the Green Belt provided they ling land within it, and these are listed
MM9	Reasoned Justification para 4.3.21	4 <del>.3.2</del> 1	if constructed after 1 July 1948,	as it was built originally. For the avo	ouilding as it existed on 1 July 1948 or, idance of doubt, if no building existed building as it was originally built after
MM9	Reasoned Justification para 4.3.23	4 <del>.3.23</del>			e the overall impact on the openness it
MM9	Reasoned Justification para 4.3.25	4.3.25	villages that are of a scale and a Proposals within these areas ar appropriate. However, the built some instances, proposals here assessed on a case-by-case ba also be appropriate. Those villa would also need to be assessed account of when assessing whe	nty, settlement boundaries have neve form that enable a boundary to be est re considered to be in the village and form of many of the villages extends e may also be considered to be in the asis and, if considered to be in the villa ages for which no boundary has been d on a case-by-case basis. <u>There are</u> <u>ether a site is located within the village</u> e proposed development's relationship	tablished with a degree of certainty. limited infilling here would be wider than the boundary and, in village. These will need to be age, then limited infilling here would i identified are listed in the policy and a number of considerations to take

Policy P	Policy P3: Countryside							
MM10	Policy para (1)							
		<ul> <li>(c) does not lead to greater physical or visual coalescence between the (i) Ash and Tongham and (ii) either Aldershot or Ash Green village.</li> </ul>						
MM10	Reasoned justification para 4.3.34a	4.3.34a Significant growth is planned to occur to the south eastern corner of the previously defined Ash and Tongham urban area. Whilst an element of merging will occur between the urban area and the northern extent of Ash Green village, it is important that this is limited to this area to protect the separate identities of these settlements. Any development within the remaining area of land that is designated countryside will be strongly resisted.						
MM10	Monitoring indicators	Indicator Percentage of appeals allowed for applications for new buildings in the inset villages Number of planning decisions, including appeals, granting permission for development in the countryside that is not in accordance with the policy	Target         Reduction in the percentage of appeals allowed         N/A	Data source         Planning permissions and appeals				

Policy F	94: Flooding, f	lood risk and groundwater protection	zones					
MM11	Policy para (2)	(2) Development in areas at <u>medium or high</u> risk of flooding, as identified on the latest Environment Agency flood risk maps and the Council's Strategic Flood Risk Assessment, including the 'developed' flood zone 3b (functional floodplain), will be permitted provided that:						
MM11	Policy para (3)	(3) Development proposals in the 'developed' flood zone 3b will also only be approved where the footprint of the proposed building(s) is not greater than that of the existing building(s) and there will be no increase in development vulnerability. Proposals within these areas should facilitate greater floodwater storage.						
MM11	Monitoring Indicators	Indicator Number of <u>planning decisions</u> , <u>including appeals</u> , <u>granting</u> <u>permission not in accordance with</u> <u>Policy P4</u> <del>applications permitted for</del> highly vulnerable uses in flood risk zone three Percentage of appeals allowed for applications refused on flood risk grounds	Target         No planning permissions that are not in accordance with Policy P4 in flood zone 3b or 3a for highly vulnerable uses         Reduction in percentage of appeals allowed	Data source Planning applications permissions and appeals Planning appeals				

Policy F	Policy P5: Thames Basin Heaths Special Protection Area				
MM12	Policy para (1)	(1)	Permission will only be granted for development proposals where it can be demonstrated that doing so would not give rise to adverse effects on the ecological integrity of the Thames Basin Heaths Special Protection Area (SPA), whether alone or in combination with other development. Where one or more adverse effects on the integrity of the SPA will arise, measures to avoid and mitigate these effects must be delivered and secured in perpetuity. These measures are unlikely to be acceptable unless must be agreed with Natural England in accordance with South East Plan policy NRM6.		
MM12	Policy para (2)(c)	(2)(c)	Residential development of over 50 net new dwellings that falls between five and seven kilometres from the SPA may be required to provide avoidance and mitigation measures. This will be assessed on a case-by-case basis and agreed in consultation with Natural England.		
MM12	Policy para (3)(d)	(3)(d)	Developments may secure or provide bespoke SANG. Proposals for new SANGs will not are unlikely to be acceptable unless agreed by Natural England. Large developments may be required to provide bespoke SANG.		
MM12	Policy para (4)	(4)	Where further evidence demonstrates that the integrity of the SPA can be protected using different distance thresholds or with alternative measures (including standards of SANG provision different to those set out in this policy). the Council will agree these must be agreed in consultation with Natural England.		
MM12	Reasoned justification para 4.3.50c		"Adverse effects on integrity" refers to the definition under the Habitats Regulations. In line with the Habitats Regulations, development proposals should be screened to establish whether they are likely to have significant effects on the SPA. All net new residential development up to five km from the SPA, and developments of over 50 net new residential units five to seven km from the SPA are considered likely to have a significant effect. Where significant effects are likely, and proposals must undergo Appropriate Assessment to identify measures that avoid, as a first step, and mitigate any adverse effects. However, il ft these residential developments provide or contribute to appropriate SANG and SAMM measures in accordance with the Thames Basin Heaths Special Protection Area Avoidance Strategy (the strategy), they will not be required to undergo Appropriate Assessment it is likely that it can be concluded that no adverse effects on the integrity of the SPA will occur as a result of increased recreational pressure.		

MM12	1						
1111112	Reasoned justification para 4.3.54	4.3.54	In the zone of influence, beyond the exclusion zone and up to 5km (linear) from the SPA, a net increase in the number of residential units is likely to lead to increased recreational use of the SPA. Visitor surveys produced by Natural England demonstrate that 70 per cent of visitors to the SPA come from within this distance. In order to avoid this impact, net new residential development must secure or provide Suitable Alternative Natural Greenspace (SANG) and provide funding for Strategic Access Management and Monitoring (SAMM). Proposals for student accommodation, care homes and other types of permanent accommodation not listed in paragraph 4.3.51 may not need to provide avoidance and mitigation measures. This will be assessed on a case by case basis <u>and agreed in consultation with Natural England</u> .				
MM12	Reasoned justification para 4.3.60	4.3.60	<u>The Council will consult with Natural England on Pp</u> roposals for new SANGs must be agreed by Natural England and. SANG proposals will be expected to follow Natural England's SANG guidelines. Developers may propose bespoke SANGs that provide avoidance for their own developments, either within the development site or off-site in an appropriate location. The size requirements for new SANGs set out in the SANG guidelines often mean that SANGs cannot be delivered on smaller sites. The Council therefore provides strategic SANGs which developers of smaller sites can pay a tariff to use.				
		• •					
Policy I	E1: Meeting er	nployme	ent and retail needs				
Policy E	E1: Meeting er Policy para (1a)	nployme	To meet the borough-wi	de need for retail and leisu dicated in the table below:	re uses, land has beer	allocated for an approximate net

	Policy para		To meet the borough-wi gain of floorspace as inc Comparison goods retail (A1) uses Convenience goods	dicated in the table below: <u>Net capacity to 2030</u> (sq m)	Assumed gross capacity (sq m)	n allocated for an approximate net	
	Policy para		To meet the borough-wi gain of floorspace as inc <u>Comparison goods</u> retail (A1) uses	dicated in the table below: Net capacity to 2030 (sq m) 28,202	Assumed gross capacity (sq m) 40,289	allocated for an approximate net	

Policy E	E2: Location fo	r new employment floorspace
MM14	Policy paras (1) to (4)	Office and Research & Development:         (1)       Proposals for new office and research & development (B1a and B1b) floorspace will be directed sequentially to: <u>Guildford town centre and Office and Research &amp; Development Strategic Employment Strategic Employment Strategic Employment</u> Sites <sup>24</sup> . Only if sites cannot be found in these locations should edge of centre sites and locations within 500m of a public transport interchange be considered.         (a)       Guildford town centre, then         (b)       locations within 500m of a public transport interchange, then         (c)       Offices and Research & Development Strategic Employment Sites1 unless:         (i)       the proposed floorspace is limited in scale (less than 200 sq m or 25% of the existing office/R&D floorspace whichever is the lower) and/or         (ii)       ancillary to the primary use of the site.
		<ul> <li>(2) The sequential approach does not apply to proposed floorspace included in the site allocations in the Local Plan.</li> <li>(4)(3) The expansion of existing offices in locations outside the town centre, and Strategic Employment Sites and Locally Significant Employment Sites should be limited to 25% or less of the existing office and R&amp;D floorspace. and any development not limited in scale is to be directed to sequentially preferable locations.</li> </ul>
		<ul> <li>(3)(4) If the expansion of existing offices in locations outside the town centre and Strategic Employment Sites exceeds Where net additional floorspace exceeding 200 sq m or 25% of the existing office and R&amp;D floorspace of the planning application site boundary on a site-by-site basis-is proposed (whichever is the lower) in the redevelopment or extension of a building in locations other than those set out above, it will need to be demonstrated that there are:</li> <li>(a) there are operational needs of business for on-site expansion, no sites available in the locations set out above</li> <li>(b) there are no suitable sites available in the town centre and the Strategic Employment Sites there is a demonstrated need, and</li> <li>(c) the site is accessible, or canwill be made accessible, bysustainable modes of transport.</li> </ul>
MM14	Definitions para 4.4.21a	<u>4.4.21a To avoid doubt the 25% applies to the existing floorspace that is within the red line of the planning application. This could comprise an individual building or a number of commercial units.</u>

Policy E	3: Maintaining	g emplo	yment capacity and improving employment floorspace
MM15	Policy para (0b)	0(b)	The Office (B1a) and Research & Development (B1b) Strategic Employment Sites are: (a) Guildford Town Centre employment core (b) Surrey Research Park (extended) (c) Guildford Business Park (d) 1000, 2000 and 3000 Cathedral Hill (e) London Square, Cross Lane (f) 57 and Liongate Ladymead (g) The Guildway, Portsmouth Road (h) The Pirbright Institute (i) Send Business Centre/Tannery Studios Tannery Lane, Send
MM15	Policy paras (3) & (4)	<u>(3)</u> (4) ( <u>4)</u> (3)	On Strategic and Locally Significant Employment Sites, Once the period of the comprehensive and active marketing should also include consideration of is complete, anotheralternative suitable B class employment use should be considered, followed by anyand other employment generating use, before change of use to residential or other use with no on-going employment use will be permitted. Outside of the designated employment sites, employment floorspace will be protected in line with the latest needs assessment and the loss will be resisted unless the site is allocated for an alternative use within the Local Plan. Redevelopment or change of use to a non-employment use will only be acceptable housing use will be acceptable if evidence is provided of active and comprehensive marketing of the site for its current use for a continuous period of at least 12 months prior to submission of a planning application. If the site is allocated for an alternative use within the Local Plan, the marketing period will not be required.
MM15	Policy paras (6) & (7)	<u>(6)</u> (7)	Redevelopment or change of use to a non-employment use will only be acceptable where the land or premises are unsuitably located in terms of its impact on the environment, levels of traffic movement, its accessibility to public transport and its link with the infrastructure, and its impact on the amenity of the area or adjoining occupiers. The provision of ancillary uses on a Strategic or Locally Significant Employment Site that complement and positively enhance the functioning of the employment area will be supported.

MM15	Reasoned Justification para 4.4.31a	4.4.31a The provision of ancillary uses as referred to in Policy E3(7) within employment areas can serve to enhance the function and attraction of these sites to businesses and their employees and reduce the need for staff to travel to alternative facilities away from the workplace. Such uses may be provided on site either as new buildings, by means of expansion of an existing B1, B2 or B8 use or as redevelopment of part of an existing B1, B2 or B8 use. Examples of ancillary uses considered appropriate on a Strategic or Locally Significant Employment site that would be supported include small local shops, gymnasia, creches and canteens.		
Policy E	4: Surrey Res	earch Park		
MM16	Policy para (1)	described in policy A26, will be design and innovation activities (b) and (c) of the Town and Co complementary to the activities	Research Park shown on the Policies N protected for business use comprising s, in any science, including social science untry Planning (use Classes) Order 198 of the University of Surrey. MM16	Monitoring Indicators	Indicator Total amount of appropriate additional B class floorspace permitted and completed on the site, <u>comprising offices, research,</u> <u>development, design and innovation</u> <u>activities</u> which is complementary to the activities of the University of <del>Surrey</del>	Target         Approx. 30,000 sq m B1a, b and c over the plan period that is complementary to the activities of the University of Surrey (100% of development)	Data source Planning applications and appeals and building completions data

Policy I	E5: Rural ecor	omy
MM17	Policy para (1)(c)	(c) the retention and development of <u>accessible</u> local services and community facilities in <u>ourthe</u> inset and identified villages, such as local shops, meeting places, sports venues, <u>open space</u> , cultural buildings, public houses and places of worship, which respect the character of the countryside, will be supported.
MM17	Policy para (5)	(5) Proposals that would result in the loss of shops and services that provide for everyday needs (within Use Class A1) located in rural areas but outside of Local and District Centres, will only be acceptable if evidence is provided of active and comprehensive marketing of the site for its current use for a minimum of 12 months prior to submission of a planning application.
Policy I	E7: Retail and	leisure uses in Guildford Town Centre
MM18	Policy para	(1) By 2034, Guildford town centre will have:
	(1)	<ul> <li>(a) a new retail-led, mixed-use development of 41,000 sq m (gross) of additional comparison goods floorspace on the North Street regeneration site within its primary shopping area.</li> <li>(b) developments of other town centre uses that contribute to the liveliness of the town centre including food and drink, more gyms and cinema screens;</li> <li>(c) approximately 1,300 new homes, particularly on upper floors as part of mixed use developments.;</li> </ul>
		Proposals for new retail and main town centre leisure uses
		(1a) In order to strengthen the liveliness and economic resilience of Guildford town centre, new retail and leisure uses located within the centre will be supported. Where no suitable sites are available within the centre, sites on the edge of the centre will be considered.
MM18	Policy para (5)	(5) <u>Within the Primary Shopping Area, Ee</u> xceptionally the loss of shopping area uses (Class A) at ground floor level will be permitted, subject to the above criteria, where the proposed use is appropriate to a town centre shopping frontage.
MM19	Policy para (6)	(6) Proposals for new food takeaways within 500m of schools will not be accepted because of the potential negative impact on the health of school children.

MM18	Reasoned justification para 4.4.85	4.4.85	National planning policy sets out two tests for applications for certain main town centre uses, the sequential use and retail impact tests assessment. In considering proposed developments of any main town centre use on sites outside of designated centres on sites that are not allocated for such uses, the sequential testassessment must be applied. Retail and leisure proposals over 500 sq m on unallocated land outside of designated centres must be accompanied by an retail impact assessment. This will help to preserve the liveliness of our centres, and to protect them from significant adverse impacts from new retail and leisure developments in less suitable locations.
Policy E	8: District Ce	ntres	
MM20	Policy para (4)	(4)	Retail and leisure proposals over 500 sq m (gross) located outside of a district centre, local centre, or Guildford Town Centre, and where the site is not allocated in the local plan must be supported by a retail impact assessment.
MM19	Policy para (5)	<del>(5)</del>	Proposals for new hot food takeaways (Use Class A5) within 500m of schools will not be accepted because of the potential negative impact on the health of school children.
MM21	Reasoned justification para 4.4.89	4.4.89	The NPPF sets out two tests that must be applied when considering developments of <u>certain</u> main town centre uses that are not in a centre and that are not allocated in this Local Plan. These are the sequential test and the <u>retail</u> impact test. In considering proposed developments of any main town centre use on sites outside of designated centres on sites that are not allocated for such uses, the sequential test must be applied. Retail and leisure proposals over 500 sg m on unallocated land outside of designated centres must be accompanied by an impact assessment. This will help to preserve the liveliness of our centres, and to protect them from significant adverse impacts from new retail and leisure developments in less suitable locations.

Policy E	Policy E9: Local Centres and isolated retail units			
MM22	Policy para (4a)	<u>4(a)</u>	When developed, the new local centres that are planned to be built at the strategic sites of:         (a) Gosden Hill (site allocation A25);         (b) Blackwell Farm (site allocation A26); and         (c) the former Wisley Airfield (site allocation A35)         will be treated as Local Centres within the context of this plan, and their location and boundaries designated in the next Local Plan review.	
MM20	Policy para (6)	(6)	Retail and leisure development proposals over 500 sq m (gross) which are not located in a local centre, <u>district centre, or Guildford Town Centre,</u> and where the site is not allocated for the proposed use must be supported by a retail impact assessment.	
MM19	Policy para (7)	(7)	Proposals for new hot food takeaways (Use Class A5) within 500m of schools will not be accepted because of the potential negative impact on the health of school children.	
MM21	Reasoned justification para 4.4.94	4.4.94	The NPPF sets out two tests that must be applied when considering developments of <u>certain</u> main town centre uses that are not in a centre and that are not allocated in this Local Plan. These are the sequential test and the <u>retail</u> impact test. In <u>considering proposed developments of any main town centre use on sites outside of designated centres on sites that are not allocated for such uses, the sequential test must be applied. Retail and leisure proposals over 500 sq m on <u>unallocated land outside of</u> <u>designated centres</u>, and to protect them from significant adverse impacts from new retail and leisure developments in less suitable locations.</u>	

Policy I	Policy D1: Place shaping			
MM23	Policy (whole	POLICY D1: Place shaping		
	policy)	(1) All new developments must achieve high quality design and enhance the environment in which they are set.		
		<ul> <li>(2) Residential developments of 25 or more dwellings should:         <ul> <li>(a) provide a harmonious, integrated mix of uses, where appropriate, that fosters a sense of community and contributes to inclusive communities that provide the facilities and services needed by them</li> <li>(b) provide places for communities to meet and interact, such as play and recreation and other public spaces</li> <li>(c) be designed to facilitate and promote walking, providing a high quality environment for pedestrians, and where possible allowing short walking distances to amenities</li> <li>(d) create places that are easy to get to and through, foster active lifestyles, are easy to understand and navigate, and feel safe during the day and night, and</li> <li>(e) be designed to facilitate the delivery of high quality communications infrastructure to support sustainable modern living, and</li> <li>(f) provide convenient and safe routes through the development and to nearby areas for pedestrians and cyclists.</li> </ul> </li> </ul>		
		(3) All new developments will be required to achieve high quality design that responds to distinctive local character (including landscape character) of the area in which it is set. Essential elements of place making include creating economically and socially successful new places with a clear identity that promote healthy living; they should be easy to navigate, provide natural security through layout and design with attractive, well enclosed, and overlooked streets, roads and spaces with clear thought given to the interrelationship of land use to external space.		
		(4) All new development is expected to have regard to and perform positively against the recommendations set out in the latest Building for Life guidance and conform to the nationally described space standards as set out by the Ministry of Housing, Communities and Local Government (MHCLG).		
		(5) New development shall be of a high quality and inclusive design, as per the Design Guide Supplementary Planning Document (SPD), and all new development will be required to address the following;		
		Distinct local character		
		(6) All new development will be designed to reflect the distinct local character of the area and will respond and reinforce locally distinct patterns of development, including landscape setting. Proposals will take account		

	<u>of local design guidance contained within conservation area appraisals, DPD's, neighbourhood plans and</u> <u>SPDs.</u>
	(7) Given the size, function and proposed density of the strategic allocations it may not always be desirable to
	reflect locally distinct patterns of development. These sites must create their own identity to ensure
	cohesive and vibrant neighbourhoods.
	Safe, connected and efficient streets
	(8) All new development will be designed to ensure it connects appropriately to existing street patterns and
	creates safe and accessible spaces. Particular regard shall be given to maximise opportunities for pedestrian and cycle movement and the creation of a high quality public realm.
	Network of green spaces and public places
	(9) All new development will be designed to maximise the opportunity for and linkages between green spaces
	and public places, and include high quality landscaping that reflects the local distinctive character.
	Crime prevention and security measures
	(10) All new development will be designed to reduce opportunities for crime and antisocial behaviour.
	Access and inclusion
	(11) All new development will be designed to meet the needs of all users, this includes the setting of the
	building in the wider environment, the location of the building on the plot, the gradient of the plot, transport infrastructure and public realm.
	Efficient use of natural resources
	(12) All new development will be designed with regard to efficient use of natural resources including passive solar gain to maximise the use of the sun's energy for heating and cooling.
	Infrastructure to create smart places
	(13) All new development will be designed in a manner that:
	(a) supports technological and digital advances, including the provision of sufficient ducting space for future
	digital connectivity infrastructure;
	(b) seeks to achieve high quality digital connectivity, enabling Fibre To The Premises (FTTP) where practical;
	(c) enables mobile connectivity within the development;

	(d) provides second to convise from a respect of providers
	(d) provides access to services from a range of providers.
<u>(14)</u>	Further innovation and provision for 5G, Wifi and other technologies will be encouraged.
Ma	sterplans for strategic sites
<u>(15)</u>	Developers will be required to produce Masterplans for Slyfield Area Regeneration Project (A24), Gosden Hill Farm (A25), Blackwell Farm (A26) and the former Wisley airfield (A35) and these will be subject to assessment by a Design Review Panel. The masterplanning process shall engage with the local community.
<u>(16)</u>	In order to ensure future cohesive and vibrant neighbourhoods, they must demonstrate how the development responds to the immediate context as well as;
	<ul> <li>(a) Creates functional places</li> <li>(b) Supports mixed use tenures</li> <li>(c) Includes successful public spaces</li> <li>(d) Is adaptive and resilient</li> <li>(e) Has a distinctive character</li> <li>(f) Is attractive</li> <li>(g) Encourages ease of movement</li> <li>(h) Creates a sustainable environment in relation to access to services and facilities</li> </ul>
(17)	Planning applications will be consistent with the Masterplans, which must be kept under review.
Use	e of Design Review Panel
<u>(18)</u>	In addition to the strategic sites, the Council will expect other large schemes to be subject to assessment by a Design Review Panel.
Vill	ages
<u>(19)</u>	Proposals for new development within villages will have particular regard to;
	<ul> <li>(a) The distinctive settlement pattern of the village and the important relationship between the built development and the surrounding landscape</li> <li>(b) Important views of the village from the surrounding landscape</li> <li>(c) Views within the village of local landmarks</li> </ul>
Asl	n & Tongham
(20)	In order to avoid piecemeal development and to protect and enhance the existing character of Ash &

			<ul> <li>Tongham and Ash Green, proposals within the area will have particular regard to;</li> <li>(a) The relationship and connectivity with the existing urban area</li> <li>(b) The relationship and connectivity between allocated sites in different ownerships</li> <li>(c) The existing character of Ash &amp; Tongham and Ash Green</li> <li>(d) The future urban edge and its relationship with the surrounding countryside at the allocated site's boundaries</li> </ul>
MM23	Reasoned justification paras 4.5.13 to 4.5.18		Our Corporate Plan (2018-2023) identifies regenerating and improving Guildford town centre and other urban areas as one of three strategic priorities supporting its "Place Making" theme. Development within Guildford Town Centre will need to have regard to a very particular set of circumstances and this policy should be read in conjunction with Policy S3: Delivery of development and urban regeneration within Guildford Town Centre.
		4.5.01	Innovation is a fundamental theme of the Council's Corporate Plan and the creation of smart places infrastructure across Guildford is a priority. In this regard, the Plan identifies the need for potential future technological and digital advances to be taken into account in planning, regeneration and development decisions.
		<u>4.5.8g</u>	The greater part of urban Guildford has good broadband and mobile phone signal connectivity. However, digital connectivity has been identified as a challenge by business, particularly in rural areas. Furthermore, because of the reliance on copper wire connections from street cabinets for many subscribers, download and upload speeds vary greatly.
		<u>4.5.8h</u>	The Council considers it essential that new development is planned and designed to enable appropriate digital infrastructure and to be at the forefront of advances in broadband technology. Doing so will help ensure that Guildford borough remains a highly attractive location for businesses and residents alike and development supports delivery of the Government's Industrial Strategy.
		<u>4.5.8i</u>	A flexible, but ambitious approach is regarded as appropriate in achieving development that supports innovation and is responsive to the rapid rate of change in relation to digital technology. The provision of FTTP is viewed a desired default technology, however it is recognised that this may not be practical in all cases. Similarly, the Council's aspiration is that connectivity speeds of at least 1Gbps offered by full (synchronous) FTTP could be achieved. FTTP and high quality connectivity will thus be encouraged in relation to new development, and particularly at development of major residential and employment sites.
		<u>4.5.8j</u>	The Council will be working closely with external strategic partners like Superfast Surrey, and Network Rail to optimise fibre network interventions, including enabling the use of "dark" (unlit) fibre and to promote

		further innovations relating to in	nproving digital connectivity.	
MM23	Monitoring indicators	Indicator Number of planning decisions, including appeals, granting permission which have been subject to assessment by a Design Review Panel	Target <u>N/A</u>	Data source Planning permissions and appeals

Climate Change Adaptation
(3) <u>All Dd</u> evelopments should be fit for purpose and remain so into the future. <u>Development proposals</u> <u>Proposals for major development</u> are required to set out in a sustainability statement how they have incorporated adaptations for a changing climate and changing weather patterns in order to avoid increased vulnerability and offer high levels of resilience to the full range of expected impacts.
Renewable, low carbon and decentralised energy
(4) The development of low and zero carbon and decentralised energy, including (C)CHP* distribution networks, is strongly supported and encouraged.
(5) Where (C)CHP distribution networks already exist, new developments are required to connect to them or be connection-ready unless it can be clearly demonstrated that utilizing a different energy supply would be more sustainable or connection is not feasible. All new developments are required to connect to (C)CHP distribution networks where they exist, or incorporate the necessary infrastructure for connection to future networks, unless it can be clearly demonstrated that doing so is not feasible or that utilising a different energy supply would be more sustainable.
(6) Proposals for development within Heat Priority Areas as shown on the Policies Map and all sufficiently large or intensive developments must demonstrate that heating and cooling technologies have been selected in accordance with the following heating and cooling hierarchy unless it can be clearly demonstrated that an alternative approach would be more sustainable: demonstrate that (C)CHP has been given adequate consideration as the primary source of energy.
<ol> <li>Connection to existing (C)CHP distribution networks</li> <li>Site wide renewable distribution networks including renewable (C)CHP</li> <li>Site wide gas-fired (C)CHP distribution networks</li> <li>Renewable communal heating networks</li> <li>Gas-fired communal heating networks</li> <li>Individual dwelling renewable heating</li> <li>Individual dwelling heating, with the exception of electric heating</li> </ol>
(7) All (C)CHP systems are required to be scaled and operated in order to maximise the potential for carbon reduction. <del>Developments that do not connect to or implement (C)CHP or communal heating networks should be 'connection-ready'.</del>
(8) Energy statements must be provided to demonstrate and quantify how development will comply with the energy requirements of this policy. Guildford Borough Council will work proactively with applicants on

			major developments to ensure these requirements can be met.
		Carb	on reduction
		(9)	New buildings must achieve a reasonable reduction in carbon emissions of at least 20 per cent <u>below the</u> <u>relevant Target Emission Rate (TER) set out in the Building Regulations 2010 (as amended) (Part L)</u> . This should be achieved through the provision of appropriate renewable and low carbon energy technologies in the locality of the development <u>and improvements to the energy performance of the building</u> . Where it can clearly be shown that this is not possible, offsite offsetting measures in line with the energy hierarchy should be delivered. <u>Proposals should set out how this will be achieved in an energy statement</u> .
		(10)	Retail units falling within Use Classes A1, A2, A3 and A4 in Guildford Town Centre are not subject to the carbon reduction requirement at paragraph (9).
		<u>(11)</u>	Planning applications must include adequate information to demonstrate and quantify how proposals comply with the energy requirements at paragraphs 5-10 of this policy. For major development, this should take the form of an energy statement.
MM24	Definitions para 4.5.20	4.5.20	The highest level <u>"national standard" of for</u> water efficiency <u>means-refers to any nationally described</u> <u>standard for water consumption in new developments. The "highest national standard" refers to the</u> <u>standard that has the lowest water consumption. At the present time, the highest national standard that</u> <u>developments should achieveis</u> the "optional requirement" described by regulation 36 paragraph 2(b) of the Building Regulations 2010 as a minimum. This "optional requirement" which sets a water efficiency standard for new <u>buildings-dwellings</u> of 110 litres per occupant per day. If <u>one or more the "optional</u> <u>requirement" building regulation is tightened, or a new national standards is are</u> introduced <sub>1</sub> , the highest <u>level of water efficiency will refer to the standards</u> that <u>has have</u> the lowest water consumption <u>will apply</u> . Compliance with the "optional requirement" is assessed through the building regulation process.
MM24	Definitions para 4.5.24	4.5.24	(C)CHP refers to both combined cooling, heating and power (CCHP) and combined heating and power (CHP). The energy hierarchy should be followed when considering which technology to use and consideration should be given to whether the need for cooling can be met through passive cooling and other design features. The solution that results in the lowest carbon emissions should be chosen.
MM24	Definitions para 4.5.30	4.5.30	New developments, except retail developments in Guildford Town Centre, but including non-retail units within mixed use developments, must achieve a reasonable reduction in carbon emissions of at least 20 per cent through the provision of appropriate low and zero carbon energy technologies in the locality of the

			development and improvements to the energy performance of the building. This should be achieved after energy efficiency has been addressed, in line with the Energy Hierarchy. Technologies will be considered appropriate only where they would be effective. The reduction in emissions is judged against a baseline of the relevant Target Emission Rate (TER) set out in the Building Regulations. For types of development where no TER is set out, reductions should be made against the typical predicted energy use of building services. This The 20% figure represents a minimum standard and where possible this should be improved upon exceeded in order to meet the requirement to deliver the lowest level of carbon emissions (direct and embodied). The Council will review this standard at appropriate intervals.
MM24	Reasoned justification para 4.5.38	4.5.38	The Guildford Environmental Sustainability and Climate Change Study identifies the particular issue of increasing pressure on water stocks in an area already classed as being under serious water stress. Water consumption in our borough is significantly higher than in other parts of the UK. This indicates both a significant scope for improving the way we use water and the need for a water efficiency standard in new dwellings above the basic national standard. At the present time, the only standard that can be adopted highest national standard is the "optional requirement" set out in the building regulations in regulation 36 paragraph 2(b) of the Building Regulations 2010 (as amended) of 110 litres per occupant per day. However, this standard may be improved in the future and it is considered that local circumstances warrant the implementation of the highest standard available and the highest standard will always be sought. This standard is considered a minimum as in many cases it may be possible to achieve a better standard.
MM24	Reasoned justification para 4.5.39	4.5.39	The Surrey Waste Partnership, comprising Surrey County Council and Surrey's Borough and District Councils, is responsible for setting the waste management strategy. Surrey County Council is responsible for implementing much of the strategy through its Waste Plan. The waste management behaviour of households in our borough is best addressed through policies and action plans created by our recycling and waste services team. However, around a third of the UK's waste comes from the construction and demolition sector, which is an area where planning policy can have an impact. Construction waste should be reused and recycled <u>where possible</u> in line with the waste hierarchy.

Policy [	D3: Historic er	nvironment		
MM25	Policy para (2)	heritage asset, whether design justification to show that the pu significance or special interest	eable resource and works, which would ated or non-designated, or its setting, wi blic benefits of the proposal considerably of the heritage asset in question. <u>The im</u> ets and their settings will be considered	Il not be permitted without a clear y outweigh any harm to the pact of development proposals on

Policy D4: Chara MM23 Policy (whole policy)	cter and design of new development – DELETED POLICY         POLICY D4: Character and design of new development         (1)       High quality design is expected in the borough. All developments will:         (a) integrate well with the natural, built and historic environment         (b) respect important public views and help create attractive new views and vistas         (c) create attractive, safe and accessible places that discourage crime and disorder through design         (d) respond meaningfully and sensitively to the site, its characteristics and constraints, and the street patterns, spaces around buildings, layout, grain, scale, massing, proportions, height and materials of surrounding buildings         (e) ensure appropriate density to make the most efficient use of the land whilst responding to local character and context         (f) be laid out to make the best use of the natural features such as topography, trees and hedges, watercourses, ponds and levels, and enhance views into and out of the site         (g) promote and reinforce local distinctiveness to create a sense of place with innovative architecture
	<ul> <li>encouraged in the appropriate context</li> <li>(h) provide visual interest at pedestrian level</li> <li>(i) be expected to have regard to and perform positively against the recommendations set out in the latest Building for Life guidance</li> <li>(j) be expected to use art, appropriate materials and landscaping of a nature appropriate to their setting</li> <li>(k) be designed to minimise the visual impact of traffic and parking</li> <li>(l) conserve locally and nationally important heritage assets and conserve or enhance their settings</li> <li>(m) have no unacceptable effect on the amenities enjoyed by the occupants of buildings in terms of privacy, noise, vibration, pollution, dust, smell and access to sunlight and daylight</li> <li>(n) conform to the nationally described space standards as set out by the Department of Communities and Local Government (DCLG).</li> <li>(2) In addition to the above, proposals for new development within villages will have particular regard to:</li> <li>(a) the distinctive settlement pattern of the village and the important relationship between the built development and the surrounding landscape</li> <li>(b) important views of the village from the surrounding landscape</li> <li>(c) views within the village of local landmarks.</li> </ul>

MM23	Reasoned justification para 4.5.49b	4.5.49b The NPPF also recognises the role that public art has. Opportunities will be sought for innovative and dynamic public art that has residents and artists at its core whilst celebrating and enhancing its rich heritage of architecture, landscape and public art. The Council's emerging Public Art Strategy will include consideration of the role that developers can take in providing art to enhance the environment in and around development sites, and will set out good practice and recommended commissioning processes.
MM23	Key Evidence and Monitoring Indicators	Key Evidence         []         Monitoring Indicators         []
Policy I	D1: Infrastruc	ture and delivery
MM26	Policy para (4)	(4) If appropriate, the imposition of Grampian conditions should be considered as a means to secure the provision of infrastructure when it is needed. If the timely provision of infrastructure necessary to support new development cannot be secured in line with this policy, planning permission will be refused.
MM26	Policy para (5a to 8)	<ul> <li>(5a) Where an applicant advises that their development is unviable with the policy and infrastructure requirements, the Council will consider whether these costs were taken into account in the price paid for the site (or any agreement to purchase the site). If these costs were taken into account, as is required by the Council, but there are higher costs associated with the site that were unknown at this time, then the Council will take this factor into account when considering the viability and acceptability of the proposal.</li> <li>(6) The non-site specific and more general infrastructure requirements are set out in the Planning Contributions Supplementary Planning Document 2011, which will be updated as required.</li> </ul>
		(7) Where appropriate, we will collect the Community Infrastructure Levy from developments in the borough. We will use Community Infrastructure Levy receipts towards providing infrastructure to support development, and will facilitate the spending of up to one quarter of Community Infrastructure Levy receipts originating from each parish and from Guildford town on local priorities to support development.
		(8) In allocating developer infrastructure contributions, we will prioritise Thames Basin Heaths Special Protection Area mitigation and avoidance in order to ensure that we meet our legal responsibilities.

MM26	Reasoned justification 4.6.6.6a to 4.6.6b		To ensure that the scale of development set out in the Local Plan can be delivered, we have considered the impact of the Plan policies and other requirements on the viability of development included in the Plan. On this basis, we require that these impacts and related costs are accounted for in the price paid for the site (or any agreement to purchase the site). Furthermore, in line with paragraph 57 of the NPPF, applicants will need to justify the need for a viability assessment at the application stage. Where an applicant advises that their development is unviable with the policy and infrastructure requirements, we will consider whether these were taken into account in the price paid for the site (or option on the site). If these had been taken into account, but there are higher costs associated with the site, we will consider negotiating. In allocating developer infrastructure contributions, we will prioritise Thames Basin Heaths Special Protection Area mitigation and avoidance in order to ensure that we meet our legal duties.
Policy ID	02: Supportin	g the De	partment for Transport's "Road Investment Strategy"
MM27	Policy para (2)	(2)	In the event that there is a material delay in the anticipated completion and or a reduction in scope of the A3 Guildford (A320 Stoke interchange junction to A31 Hog's Back junction) "Road Investment Strategy" scheme from that assumed in plan-making, or cancellation of the scheme, Guildford Borough Council will review its transport evidence base to investigate the consequent cumulative impacts of approved developments and Local Plan growth including site allocations on the safe operation and the performance of the Local Road Networks and the Strategic Road Network. In the case of material delay in the anticipated completion and or a reduction in scope in the A3 Guildford scheme, the review will consider the period up to the revised date of completion of the scheme. This review will be undertaken with input as appropriate from Surrey Council and Highways England or any other licenced strategic highway authority appointed by the Secretary of State under the Infrastructure Act 2015. The outcome of this review will determine whether there needs to be a review of the Local Plan.
MM27	Reasoned justification para 4.6.18a	<u>4.6.18a</u>	The evidence at the time of the Examination of the Local Plan was that, without the implementation of the A3 Guildford scheme, the cumulative impacts of the quantum and distribution of development in the Local Plan could be considered to become severe during the second half of the plan period. Nevertheless, the evidence also indicates that individually, site allocations may be able to be occupied in whole or substantial part without creating a severe impact on the Strategic Road Network as there are potential alternative transport measures that may reduce or limit the impact of additional traffic on the A3. A review will determine whether the proposed transport measures or additional transport measures can mitigate the

Policy II	D3: Sustainab	cumulative impacts of development traffic on the A3 either during the period that the A3 Guildford scheme is delayed, in response to a reduction in its scope or in the event of its cancellation. If a review determines that transport measures are not able to mitigate a severe impact on the A3 then a review of the Local Plan is likely to be required.
MM28	Policy paragraphs (4) and (5)	<ul> <li>(4) In terms of vehicular parking for new developments: <ul> <li>(a) in Controlled Parking Zones, or component areas thereof, in which the demand for on-street parking by residents of existing dwellings and, where allowed, 'pay and display' visitor parking exceeds the supply of designated on street parking spaces, planning permission for new residential development resulting in a net increase in dwellings will be subject to a planning obligation to require that future occupants will not be eligible for on-street residents parking permits, with the exception of disabled people who will be eligible, and</li> <li>(b) for residential new development in all other areas, and for all non-residential new development in the borough, oOff-street vehicle parking for new developments should be provided such that the level of any resulting parking on the public highway does not adversely impact road safety or the movement of other road users.</li> <li>(c) Consideration will be given to setting maximum parking standards for Guildford town centre in the Parking Supplementary Planning Document.</li> <li>(5) The Council will have regard to the latest Guildford Borough Parking Strategy in applying the above policy test for new residential development in Controlled Parking Zones or component areas thereof.</li> </ul> </li> </ul>
MM28	Reasoned justification para 4.6.24a	4.6.24a With respect to vehicular parking, the policy takes account of the March 2015 written statement to Parliament from the Minister which stated that "Local Planning Authorities should only impose local parking standards for residential and non-residential development where there is a clear and compelling justification that it is necessary to manage their local road network."NPPF at paragraph 106. This allows for maximum parking standards to be set where there is a clear and compelling justification that they are necessary for optimising the density of development in town centres that are well served by public transport. The Council will bring forward a Parking Supplementary Planning Document. The policy does not preclude developers from bringing forward proposals for car-free new development.

MM28	Reasoned justification para 4.6.24ba to 4.6.24e	4.6.24baGuildford Borough Council proposes to engage with Surrey County Council, the Local Highway Authority, to investigate the potential to amend the Traffic Regulation Order that supports the Guildford town centre Controlled Parking Zone. The forthcoming parking review may provide an opportunity to consider permit eligibility issues, particularly for new developments in areas within the Controlled Parking Zone where existing residents' demand exceeds the supply of spaces prioritised for their use. The possible exclusion of new developments, and any other restrictions on permit eligibility, would operate outside of the planning system.
		4.6.24c In the areas of the Controlled Parking Zone in which the demand for on-street resident and 'pay and display' visitor parking exceeds the supply of designated on-street parking spaces, the Local Planning Authority will apply the policy test for vehicular parking as set out. This provides an exception for disabled people who will be eligible.
		4.6.24d At present, the policy test for new residential development in Controlled Parking Zones or component areas thereof will be engaged in areas A, B, C and D of the Controlled Parking Zone.
		4.6.24e The policy does not preclude developers from bringing forward proposals for car-free new development. Any such proposal would be subject to the policy tests set out for vehicular parking.

Policy I	D4: Green and	d blue in	frastructure	
MM29	Policy para (1) and (2)	(1)	The Council will <u>maintain</u> , conserve and enhance biodiversity and will seek opportunities for habitat restoration and creation, particularly within and adjacent to Biodiversity Opportunity Areas (BOAs). The Council will produce a Green and Blue Infrastructure Supplementary Planning Document (SPD) setting out how this approach will be implemented.	
		(2)	Proposals for development must demonstrate how they will deliver appropriate net <u>New development</u> should aim to deliver gains in biodiversity where appropriate. Where proposals fall within or adjacent to a BOA, biodiversity measures should support that BOA's objectives. The SPD will set out guidance on how this can be achieved.	
MM29	Policy para (5)	(5)	Permission will only be granted for development proposals within or adjacent to national sites where it can be demonstrated that doing so would not be harmful to the nature conservation interests of the site and its function as an ecological unit.	
MM29	Policy para (7)	(7)	<u>The ecological, landscape and recreational value of watercourses</u> will be protected and enhanced. Development proposals that are likely to have an <u>adverse</u> impact on <u>the functions</u> (including across their catchments) <u>and setting of watercourses and their corridors will not be permitted</u> . Proposals must demonstrate how they will support the achievement of Water Framework Directive <u>objectives</u> and have followed guidance from the Environment Agency on implementation of the <u>River Basin Management Plan</u> Wey Catchment Management Plan and flood risk management, <u>and followed guidance in any local catchment management plans</u> . In particular, developers should take any steps necessary to avoid any downstream adverse impact on water quality objectives that may arise from their proposed development.	
MM29	Reasoned justification para 4.6.42 and 4.6.45	4.6.42	Net <u>gC</u> ains in biodiversity means improvements to biodiversity through habitat creation and/or enhancement. This should be integrated into the design of the site through the provision of new wildlife habitats, but also may include enhancement of green networks and measures on building structures. Green roofs and walls can add to the visual interest of urban areas and assist in adapting to a changing climate by providing passive cooling, as well as providing opportunities for plants and wildlife. Habitat for vulnerable species also adds value. Where adequate biodiversity gains cannot be included within a development site, off-site provision may be considered. The net-gains should be appropriate and proportionate for the development. The SPD will set out guidance on the types of measures that may be considered appropriate.	

		4.6.45	Where new open space is proposed, including new Suitable Alternative Natural Greenspaces (SANGs), within or adjacent to a BOA, these should be designed and managed to support the aims of the BOA. The Council expects the delivery of new SANGs to make a very significant contribution to achieving the net-gains in biodiversity required by the NPPF, and in realising the strategic approach to biodiversity in Surrey. The primary role of SANGs is to provide an attractive natural or semi-natural space for recreation. SANG providers must ensure that this function is compatible with biodiversity and conservation through appropriate site selection, design and management.
MM29	Definitions paras 4.6.47 to 4.6.48b	4.6.47	Proposals that include new road drainage systems should ensure that the system filters out potential pollutants. Developments that bring risk of spillages of pollutants into river catchment areas must have measures in place that prevent polluting the environment in such an event. When existing sites are re- developed, and when new sites are planned, sewage connections should be checked to make sure they are correct. Opportunities should be taken to return engineered banks to a natural state.
		4.6.48	Non navigable waterways will be protected and enhanced through the use of an eight metre wide (measured from bank top) undeveloped buffer zone within which new development will be permitted only where it benefits the ecology and/or water quality of the waterway. Existing development should not encroach any further into the buffer zone. Development can facilitate the spread of non-native invasive species, which can have devastating ecological and economic impacts. Where identified, these species should be eradicated/controlled under an agreed scheme.
		<u>4.6.48a</u>	Development likely to affect a watercourse should seek to conserve and enhance the ecological, landscape and recreational value of the watercourse and its associated corridor. Conservation and enhancement actions include good design in terms of construction and open space, re-naturalising the bank by removing hard engineering to encourage natural buffer zones for the watercourse, removing barriers to fish passage, reducing diffuse pollution and tackling non-native invasive species.
		<u>4.6.48b</u>	Main rivers are watercourses designated as such by the Environment Agency; usually larger streams and rivers, but also including some smaller watercourses of significance. Main rivers should be protected and enhanced by a minimum eight metre wide undeveloped buffer zone (measured from bank top) on both sides. Bank top is defined as the point at which the bank meets the level of the surrounding land. Eight metres is the minimum required for main rivers under the Thames Region land drainage byelaws. However, on greenfield sites where more land is available, it may be appropriate to include a larger buffer zone that varies in size and shape depending on the local circumstances. The provision of a buffer zone should also be supported by a long term ecological management plan.

MM35	Policy box,	Transport strategy
	Transport strategy and Other	(1) An improved junction on the A3 comprising the relocated A3 southbound off-slip, a new A3 southbound on-slip and connection via a new roundabout to the A3100, with associated infrastructure on the A3100 corridor within Burpham
	infrastructure	(2) Deliberative process of consideration to be undertaken as part of the development management process of Any proposals for the development of the site should have regard to the potential opportunity to provide an all movements junction of the A3 trunk road with the A3100 London Road, the B2215 London Road and the A247 Clandon Road. Land could potentially be required to be safeguarded for the provision of a connector road to the B2215 London Road/A247 Clandon Road
		(3) Land and park and ride facility of a sufficient scale as required by projected demand and in order to operate without public subsidy in perpetuity
		(4) Developer to provide <u>The provision of</u> the eastern route section of the Sustainable Movement Corridor on the site <u>on-site</u> , and <u>make</u> a necessary and proportionate contribution to delivering the eastern route section on the Local Road Network <u>off-site</u> , <u>both</u> having regard to the Sustainable Movement Corridor Supplementary Planning Document
		(5) The provision of extended and/or new bus services A significant bus network to serve the site and which will also serve the key destinations including the existing eastern suburbs of Guildford and the town centre
		(6) Provide pPermeability for pedestrians and cyclists into and from the development, especially from the urban area of Guildford
		(7) Land <u>made available for and necessary and proportionate contribution to delivering</u> Guildford East (Merrow) railway station, and necessary and proportionate contribution towards the provision of the station <del>working with Network Rail and Surrey County Council as the land owner to the south of the railway line</del>
		(8) Other off-site highway works to mitigate the impacts of the development Interventions will be required which address the potential highway performance issues which could otherwise result from the development. The Infrastructure Schedule in the latest Infrastructure Delivery Plan identifies the locations on the Local Highway Network and the Strategic Highway Network which could be expected to experience the most significant potential highway performance issues, in the absence

			of mitigating interventions		
		Other in	ifrastructure		
		(9) When determining planning application(s), and attaching appropriate conditions and obligations to planning perm regard will be had to the delivery and timing of delivery of the key infrastructure requirements on which the delive plan depends, set out in the Infrastructure Schedule in the latest Infrastructure Delivery Plan, or otherwise alterna interventions which provide comparable mitigation			
		(10)	Other supporting infrastructure must be provided on the site, including a local retail centre including a GPs surgery and community building; early years provision; open space (not associated with education provision) including playgrounds and allotments; and a two-form entry primary school to serve the development		
		(11)	Secondary educational need will be re-assessed at the time a planning application is determined at which time any recent new secondary school provision will be taken into account. The associated off site playing fields must be dual use and secured through the planning application process. <u>The location of a secondary school should be carefully considered so as to ensure convenient access from the proposed Park and Ride / public transport.</u>		
		(12)	Bespoke SANG to avoid adverse effects on the integrity of the SPA (See the IDP for further information)		
		(13)	Green corridors and linkages to habitats outside of the site, and the adjoining SNCI		
		(14)	ReduceMinimise surface water flood risk through appropriate mitigation, to ensure that run-off from the site is no greater than run-off rates from the site before development		
MM34	Policy box,	Travelle	er pitches (public)		
	Traveller pitches	(15)	The pitches will be public (tenure) forming part of the affordable housing contribution (1 pitch equates to 1 affordable home)		
	(public)	(16)	Once completed, the pitches will be provided to the registered provider <del>at nil cost</del> , for the Local Authority to allocate the occupancy and manage		
MM35	Policy box, Other issues	<u>(25)</u>	Increased landscaped buffer/strategic planting with frontage development set back from the A3 with significant additional		
			measures to mitigate the visual impact of development in this location		
		<u>(26)</u>	Create unique places that combine the highest standards of good urban design with well-designed streets and spaces		
		<u>(27)</u>	Incorporate high quality architecture that responds to the unique context of the site		
		<u>(28)</u>	Create a sustainable urban extension with bus, cycle and pedestrian links into the adjoining urban area, and the town centre		

MM35	Policy box, Opportunities	(1)	Create unique places that combine the highest standards of good urban design with well designed streets and spaces
		<del>(2)</del>	Incorporate high quality architecture that responds to the unique context of the site
		(3)	Potential to provide a through route within the site to divert the B2234 to form a more direct link to the A3 at the improved junction
		(4)	Create a sustainable urban extension with bus, cycle and pedestrian links into the adjoining urban area, and the town centre
		(5)	Reduce the risk of flooding elsewhere as far as practicable
		(6)	Provide land on-site which would form part of the future route of a connector road to the B2215 London Road/A247 Clandon Road, Road, and so realise an all movements junction of the A3 trunk road with the A3100 London Road, the B2215 London Road and the A247 Clandon Road.
Policy	A26: Blackwel	l Farm,	Hogs Back, Guildford
MM36	Policy box, Allocation	(3)	Approximately <u>35,000 30,000</u> sq m of employment (B1) on a 10-11 ha extension to the Surrey Research Park <u>of which a</u> minimum of 30,000 sq m will be delivered within the plan period and
MM36	Policy box, Requirements	(1)	Vehicular access to the site allocation will be via the existing or a realigned junction of the A31 and the Down Place access road, which will be signalized (see Policy A26a), and from the site to Egerton Road, preferably via Gill Avenue
		<del>(2)</del>	<ul> <li>The design of the improved Down Place access road or a new adjacent parallel access road will be sympathetic to its setting variously within the AONB and AGLV. The impacts of this road will be minimised through the retention and enhancement of tree cover in this area and landscaping</li> </ul>
		(3)	A through vehicular link which will be controlled is required via the above accesses between the A31 Farnham Road and Egerton Road to provide a new route for employees and emergency services to the Surrey Research Park, the University of Surrey's Manor Park campus and the Royal Surrey County Hospital, as well as a choice of vehicular access for the new residents/occupiers. This will reduce impact on the A31/A3 junction, in advance of the delivery of Highways England's A3 Guildford scheme
		(4)	Developer to provide The provision of the western route section of the Sustainable Movement Corridor on the site on-site, and make a necessary and proportionate contribution to delivering the western route section on the Local Road Network off- site, both having regard to the Sustainable Movement Corridor Supplementary Planning Document
		(5)	The provision of extended and/or new bus services A significant bus network to serve the site and <u>which will also serve the</u> key destinations including the existing western suburbs of Guildford and the town centre

		(6)	Provide pPermeability for pedestrians and cyclists into and from the development <del>, especially from the urban area of Guildford</del>
		(7)	Necessary and proportionate contribution <del>to delivering</del> <u>towards the provision of the </u> Guildford West (Park Barn) railway station <del>working with Network Rail, Royal Surrey County Hospital and Guildford Borough Council as the land owners to the south and north of the railway line respectively</del>
		(8)	Other off-site highway works to mitigate the impacts of the development Interventions will be required which address the potential highway performance issues which could otherwise result from the development. The Infrastructure Schedule in the latest Infrastructure Delivery Plan identifies the locations on the Local Highway Network and the Strategic Highway Network which could be expected to experience the most significant potential highway performance issues, in the absence of mitigating interventions
MM36	Policy box, Requirements	(11)	Secondary educational need will be re-assessed at the time a planning application is determined at which time any recent new secondary school provision will be taken into account. The associated off site playing fields must be dual use and secured through the planning application process. The location of a secondary school should be carefully considered so as to ensure convenient access via public transport and from the urban area of Guildford,
		(12)	Green corridors and linkages to habitats outside of the site, and the adjoining SNCI
		(13)	ReduceMinimise surface water flood risk through appropriate mitigation, to ensure that run-off from the site is no greater that run-off rates from the site before development
MM34	Policy box, Requirements	(16)	Once completed, the pitches will be provided to the registered provider at nil cost, for the Local Authority to allocate the occupancy and manage
MM36	<b>,</b>	<u>(24)</u>	Create unique places that combine the highest standards of good urban design with well designed streets and spaces
	Requirements	<u>(25)</u>	Incorporate high quality architecture that responds to the unique context of the site
		<u>(26)</u>	Create a sustainable urban extension with bus, cycle and pedestrian links into the adjoining urban area, and the town centre
MM36	Policy box,	(1)	Create unique places that combine the highest standards of good urban design with well designed streets and spaces
	Opportunities	<del>(2)</del>	Incorporate high quality architecture that responds to the unique context of the site
		<del>(3)</del>	Create a sustainable urban extension with bus, cycle and pedestrian links into the adjoining urban area, and the town centre
		<u>(4)</u>	Reduce the risk of flooding elsewhere as far as practicable

Policy A29: Land to the south and east of Ash and Tongham					
	Policy box, Requirements	(6)	Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, pProposals for the land west of this road <u>must should</u> respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This shouldmust include the provision of a green buffer that seeks to maintains a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond		
		(7)	Sensitive design at site boundaries that has regard to the transition from urban to rural		
		(8)	Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected		

Policy	A61: Land at A	aron's Hill, God	alming	
MM39	New policy	POLICY A6	1: Land at Aaron's Hill, Godalming	
	(whole policy)	Allocation	This site is allocated for approximately 200 homes (C3), including some self-build and custom house building	Land at Aaron's Hill, Godalming
		Requirements	<ul> <li><u>Comprehensive masterplanning of the site to</u> <u>ensure that development is successfully integrated</u> <u>with the adjoining development site within</u> <u>Waverley borough and the surrounding landscape</u> <u>context</u></li> <li><u>Improve the bridleway connecting Halfway Lane</u> <u>and New Way (in Waverley borough) for</u> <u>pedestrians and cyclists</u></li> <li><u>Avoid adverse impacts of development on the</u> <u>Wealden Heaths SPA through appropriate</u> <u>avoidance measures potentially including SANG</u></li> <li><u>An application level Habitat Regulations</u> <u>Assessment</u></li> <li><u>Agreement with Natural England that the</u> <u>development will have no adverse impact on the</u> <u>Wealden Heaths SPA</u></li> </ul>

Policy	A35: Former W	Visley ai	irfield, Ockham
MM40	Policy box, Requirements	(3)	Other off-site highway works to mitigate the impacts of the development. Interventions will be required which address the potential highway performance issues which could otherwise result from the development. The Infrastructure Schedule in the latest Infrastructure Delivery Plan identifies the locations on the Local Highway Network and the Strategic Highway Network which could be expected to experience the most significant potential highway performance issues, in the absence of mitigating interventions. To-This will include mitigation schemes to address issues:
			(a) on the A3 and M25 and at the M25 Junction 10/A3 Wisley interchange
			(b) on B2215 Ripley High Street
			(c) at the junctions of Ripley High Street with Newark Lane/Rose Lane
			(d) on rural roads surrounding the site
			(e) at junction of Old Lane with A3 on-slip (Guildford bound).
		(6)	The provision of extended and/or new bus services A significant bus network to serve the site and which will also serve key destinations including Effingham Junction railway station and/or Horsley railway station, Guildford and Cobham. This will to be provided and secured in perpetuity to ensure that residents and visitors have a sustainable transport option for access to the site
		<u>(10a)</u>	Every effort must be made to reduce the harm to the SNCI through appropriate avoidance and mitigation measures
		<u>(13a)</u>	Ensure that sufficient capacity is available within Ripley wastewater treatment works to accept wastewater from this development within its permitted limits
		<u>(23)</u>	Create unique places that combine the highest standards of good urban design with well designed streets and spaces
		<u>(24)</u>	Incorporate high quality architecture that responds to the unique context of the site
MM40	Opportunition	(2)	Create unique places that combine the highest standards of good urban design with well designed streets and spaces
		<del>(3)</del>	Incorporate high quality architecture that responds to the unique context of the site
MM34	Policy box, Requirements	(15)	Once completed, the pitches will be provided to the registered provider at nil cost, for the Local Authority to allocate the occupancy and manage

Policy	A43: Land at (	Garlick's Arch, Send Marsh/Burnt Common and Ripley
MM41	Policy box, Allocation	<ul> <li>The site is allocated for:</li> <li>(1) approximately <u>550400</u> homes (C3), including some self-build and custom house building plots, and</li> </ul>
MM41	Policy box, Requirements	Transport strategy         (0a)       Main vehicular access to the site allocation provided on the A247 frontage         (0b)       Through vehicular link between the B2215 Portsmouth Road and the A247 Clandon Road to provide an alternative route that relieves pressure on Send Marsh roundabout         (0c)       Permeability for pedestrians and cyclists into and from the development particularly to/from the B2215 Portsmouth Road         (0d)       Necessary and proportionate contribution towards an off-site walking and cycle network to the village centre of Send, the Burnt Common Warehouse site and Clandon railway station         (0e)       Necessary and proportionate contribution towards mitigation schemes to address the otherwise adverse material impacts on communities and the environment, including in Send, West Clandon and Ripley         Other infrastructure       (0f)         (0f)       Increased landscaped buffer/strategic planting with frontage development set back from the A3 with significant additional measures to mitigate the visual impact of development in this location

Policy	A58: Land arc	ound Burnt Common warehouse, London Road, Send										
MM42	Policy box, Allocation	The site is allocated for a minimum of <del>7,000-<u>14,800</u> sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) <u>over the Plan period</u> with <u>a-the</u>potential for further industrial floorspace to meet future borough needs<u>, as identified through subsequent updates to the Employment Land Needs Assessment (ELNA)</u></del>										
MM42	Policy box, Requirements	<u>Transport strategy</u> (0a) Permeability for pedestrians and cyclists into and from the development										
		(0b) Necessary and proportionate contribution towards an off site walking and cycle network between the village centre of Send, the Burnt Common Warehouse site and Clandon railway station										
		(0c) Necessary and proportionate contribution towards mitigation schemes to address the otherwise adverse material impacts on communities and the environment, including in Send, West Clandon and Ripley										
		(4) Increased landscaped buffer/strategic planting with frontage development set back from the A3 with significant additional measures to mitigate the visual impact of development in this location										
MM42	Description	(3) An initial masterplan for the site has shown that it has a total capacity for more than 14,800 sq m. However, the ELNA anticipates that approximately this amount will be required over the Plan period to 2034 to meet identified needs. The ELNA will be updated every three years and if updates show a higher need for industrial class floorspace, this site would be able to provide a larger amount either within or after the Plan period.
